Assessment Guidelines

In this assessment, you will be developing and implementing a lesson plan and engaging environment for a group of school-age youth. The purpose of this assessment is to determine your competencies in this area of planning strategies and environments based on appropriate standards and guidelines for school-age youth. Your overall goal is to create an engaging environment and lesson that supports the unique development and learning needs children between the ages of 5 and 16.

Successful completion of this Assessment requires that it be completed with a group of children with whom you are familiar. If you do not have a school-age classroom where you have ongoing contact, please make arrangements to meet with a teacher to both plan for your assessment and learn more about the children

you will be working with. When you meet with the cooperating teacher, be sure to ask about relevant assessment data and information about the learners in the classroom, which would be beneficial in terms of your environmental design, lesson planning, and implementation.

Part I: Pre-Planning Reflection:

Prior to planning your environment and lesson, it is important to consider state and national standards that will inform your planning. As well, you need to consider the unique leaners you will be working with, as well as the evidence that supports effective curricular practices. Finally, it is also essential to consider mandates and requirements, including building, program, and curricular factors, that must be adhered to in your planning. Consider each of these, and develop a 1-2 page reflection that responds to:

- The overall strategies goals, objectives, and outcomes of the program you are developing your activity and environment within
- SAY centered approaches and standards of practice as represented in established models and programs
- The standards and learning paradigms that inform your lesson planning and environmental design, including a rationale
- How you will collaborate with colleagues in development and implementing the lesson plan and environment design
- Stakeholders, including youth, who would serve as beneficial partners in developing and implementing the curriculum

In addition, consider what you have learned about SAY development and learning. In three to four paragraphs, describe why each of the following factors are essential components of lesson planning and environmental design:

- The provision of unstructured time, play, and engaging activities
- Appropriate teaching and learning activities and situations that engage, support positive interaction, and are individually, developmentally, and culturally appropriate
- Guidelines in terms of professional and ethical boundaries
- How space can be arranged to support choice, unique strengths, creative expression, critical thought, decision-making, conflict resolution, and the attainment of achievable goals

Part II: Lesson Plan Development:

You will be required to develop an instructional lesson plan on an approved content topic for the age group you are working with. Your lesson plan must include: What strategies will you use to communicate your overall goals to key stakeholders?

A. Overview

- What strategies will you use to collaboratively plan activities with key stakeholders, inclusion school-age youth?
- How will you ensure that activities support the unique development and learning needs of each child?
- What knowledge do you have about the children's unique developmental patterns, including cultural, linguistic and ability diversity?
- Attending and group facilitation skills that will support helpful group behavior and the development of trust
- How you will ensure the environment and less are inviting to SAY, including supportive actions and evidence-based approaches that will be incorporated

B. Preparation/Materials

Provide an overview that includes:

- All materials and preparation needed to carry out the described activities with attention to the following:
 - Ensuring resources are non-biased and supportive of multisensory needs
 - How SAY will be supported in their development of safety and supervision needs

o Strategies you will use to ensure a positive social and emotional climate

C. Lesson Introduction

- How will you introduce to students the purpose of the lesson to motivate them to participate in the activities and cognitively engage with the content?
- How will you connect your lesson content to previous knowledge, goals, and interests?

D. Procedure

Outline a step-by-step plan for explicit instruction, active application, and transitions within the lesson. Formative assessments (checks for understanding) should be obvious throughout as well.

E. Closure

- How will you summarize the learning from this lesson?
- How will you encourage students to use this knowledge?
- How will you connect this content to future content, student goals, and interests?
