

GATEWAYS TO OPPORTUNITY

Illinois Professional Development System

Gateways to Opportunity Scavenger Hunt Resource¹

(Revised November 2010)

Overview/Directions for Use

The following Scavenger Hunt is intended to help your students, staff, or workshop participants learn about the range of resources available on the Gateways to Opportunity Web site. The Scavenger Hunt is best used in a computer lab setting, but it can also be included in a training calendar or newsletter, or as a class assignment to be completed by individuals at home or work.

The Scavenger Hunt should be completed after a brief demonstration of the Gateways Web site to review the information found on the homepage and the kinds of resources found when you click on the primary menu links on the Gateways homepage. The question categories on the Scavenger Hunt (shown in bold and shaded) correspond to the menu links on the Gateways homepage.

Personalize the Scavenger Hunt by adding your organization or workshop title and date at the top of both documents—the Scavenger Hunt and the Answer Sheet. You may tailor the directions in the editable text box portion in the PDF to fit your use.

We Welcome Your Feedback
