ADDING/UPDATING CLASSROOMS IN THE DIRECTOR PORTAL
for Family Child Care & Family Group Child Care:

The Staff Listing within the Director Portal is a critical component. All the reports available through the portal pull information from the Staff Listing, so it is important to keep it updated. For Smart Start Workforce Grants, this is required.

Follow the steps below to access and update your Staff Listing for the Smart Start Workforce Grant application.

GETTING STARTED

Please note: Before making any additions or updates to your classroom, please ensure that appropriate staff roles are assigned in your employment record within the Registry. For Family Child Care and Family Group Child Care programs, accurately designating staff roles is crucial to ensure you receive the appropriate funding amount. Role designations will also impact which reporting materials will be required.

For programs with co-owners (e.g., a husband and wife), there are two options:

Base Grant Amount	Higher Grant Amount
• In the employment record within the Registry, list both owners as the provider ("8 - Family Child Care Provider" or "10 - Family Group Child Care Provider"). • You will then assign both providers to the classroom card. • This will allow the program to receive the base grant without requiring that the wage floor must be met, or that payroll documentation must be submitted.	• In the employment record within the Registry, choose one owner to list as an assistant ("9 – Family Child Care Asst" or "11 – Family Group Child Care Asst"). • The owner who lists themselves as an assistant must then change their role within the Registry membership employment record. • On the classroom card, list one owner as the provider and one as an assistant (with hours worked). • The system will then use the information to increase the grant amount, requiring that the program pay the assistant the wage floor, and provide payroll documentation as proof.
