

Credential AREA: Infant-Toddler Credential (Level 5)
TOPIC: CPD-IRE-PPD Custom Assessment Example
Learning Experience and Implementation

I. Assessment Competency & Standards Alignment

Gateways Competencies Assessed	Competency Alignment by citation
	Zero to Three (2016)
ITC CPD1: Identifies foundational components of high-quality, responsive, infant and toddler care	-----
ITC CPD2: Identifies culturally, individually, and developmentally responsive curricular strategies that nurture infant/toddler development, learning, mental health, and well-being	C-1a, L&L-3f
ITC CPD3: Plans and implements, in partnership with families, culturally, individually, and developmentally responsive curricular strategies and interactions that nurture infant/toddler development, learning, mental health, and well-being	SE-3c, C-2a, C-2b, C-2c, C-2d, C-2e, C-2f, C-3g, C-3i, C-3j, C-4b, C-4c, C-4e, C-4g, L&L-3a, L&L-3b, L&L-3d, L&L-3e, L&L-3g, L&L-3h
ITC IRE5: Establishes positive practitioner-family interactions and relationships that support growth, promoting positive family-child interactions and relationships from birth-3	SE-6e
ITC IRE6: Creates culturally and linguistically responsive environments, interactions, and experiences that nurture healthy infant/toddler development, learning, mental health, and well-being	SE-1j, SE-3e, SE-4c, SE-4d, SE-4e, SE-4f, SE-4g, SE-5b, SE-5f, SE-5g, SE-5h, SE-6c, SE-6d, SE-6h, C-3e
ITC CPD4: Adapts instructional practices through the use of tools and strategies supportive of the development, learning, mental health, and well-being of infants and toddlers	C-4d, C-4f, L&L-3c
ITC IRE7: Facilitates and advocates for the creation of evidence and relationship-based infant/toddler environments, interactions, and routines that support healthy infant/toddler development, learning, mental health, and well-being	-----
ITC CPD5: Justifies and advocates for practices in infant and toddler care and education supportive of young children’s healthy development and learning	L&L-3i
ITC PPD5: Designs and participates in collaborative systems and proactive, visionary leadership that ensures the healthy functioning of the infant and toddler programming and the young children and families served	-----

II. Assessment Task Description/ Directions

In this assessment, you will be developing and implementing a week-long learning experience plan for a group of infants and/or toddlers. Your planning will encompass five days and the implementation of two of the outlined learning experiences that are required. The purpose of this assessment is to determine your competencies in the areas of 1) identifying foundational components of high-quality care; 2) culturally, linguistically, and developmentally responsive curricular strategies; 3) planning, implementing, and assessing appropriate learning experiences; 4) describing and selecting appropriate content; and 5) justifying or advocating for effective curricula and learning experiences that nurture infant/toddler development, learning, mental health, and well-being.

Successful completion of this assessment requires that it be conducted during a clinical experience or with a group of infants/ toddlers with whom you have access. If you do not have an infant/ toddler classroom where you have ongoing contact, please make arrangements to meet with the teacher to both plan for your assessment and learn more about the children you will be working before you begin planning. When you meet with your cooperating teacher, be sure to ask about relevant assessment data and information about the learners in the classroom, which would be beneficial in terms of your lesson planning and implementation. It is critical that you maintain confidentiality while collecting, implementing, and recording information for this assessment.

Part I: Initial Reflection

Prior to planning your lesson, it is important to highlight foundational components of quality care that will inform your planning. As well, you need to consider the unique learners you will be working with and cultural, linguistic, and developmentally responsive strategies for those learners. You will include evidence that supports effective curricular practices. Finally, it is essential to consider mandates and requirements, including building, center, and curricular factors, that must be adhered to in your planning. Consider each of these and develop a reflection that addresses:

- Foundational components of high-quality, responsive infant and toddler care you need to take into account when you develop your learning experiences
- Relevant child assessment and family data that will help in planning your learning experience, including how you will connect with families. Consider cognitive, physical, emotional and social domains.
- Building/ center/ classroom/ curricular mandates, expectations or other factors that influence your planning

Technology Option:
- Video/audio record options
- Interactive options
- Presentation options

Part II: Learning Experience Development

Develop a learning experience plan based on the developmental, cultural, and linguistic needs of the children observed between the ages of 6 weeks and 3 years. Your first step in developing your Learning Experience Plan is for you to observe the children you have selected. Use the Developmental Profile to summarize your observation. Collect data for each of the developmental domains for which you are planning experiences. Based on the Developmental Profile and the Early Learning Guidelines, complete the Observation and Curriculum Planning Form discussing the child's development and learning profile. Your Learning Experience Plan should include the following components:

- Targeted developmental domains
- Observation data
- Description of how the learning experience will nurture infant/ toddler development, learning, mental health, and well-being
- Knowledge about this group of learners that justifies presenting this learning experience in the proposed manner
- Identification of how the learning experiences support the young child's emerging understanding of literacy, math, science, and creative expression
- Evidence-based practices, theory, research, and standards that are relevant to your planning; cite your sources of this information
- Specific outcome(s) learners will be expected to achieve at the end of the implementation of the learning experiences, aligned with appropriate standards

Technology Option:
- Collaboration options
- Interactive options

- An overview of experiences and strategies that will support child construction of knowledge through plan, exploration, and experimentation

Part III: Learning Experience Plan

- Complete the Learning Experience Plan

Part IV: Learning Experience Implementation

- Work with your cooperating teacher to implement two of the learning experiences identified and either have a peer record a portion of your teaching using your cell phone or other device or utilize feedback from your supervisor or your cooperating teacher. If you choose to record your teaching, know that your video will not be submitted. Instead, you will use this video as a reflection tool to guide you in reflecting upon your teaching.

Technology Option:
- Video/audio record options

Part V: Post-Reflection

After you have developed, implemented, and reviewed the lesson, respond to the following:

- Identify how effective your implemented strategies were in supporting young children's development and learning
- Determine modifications or adaptations you would suggest for future learning experiences
- Identify adaptive equipment that would be beneficial for use in the future
- Share your learning experiences with others, including how the experiences supported infant/toddler communication, well-being, and positive interactions with their physical and social world
- Identify positive guidance techniques that could/ should be applied to the group or individual child
- Determine strategies that you will use to share progress with families based on the learning experiences
- Identify what was learned through the development and implementation of the lessons that suggests consideration may need to be given regarding system-wide collaboration in order to better serve the child and/or family

Imagine that you are a director who is working to both support and extend knowledge of the effectiveness of high-quality curriculum. With that role in mind, respond to the following:

- Strategies that could be used to share information about curriculum with others in your community
- How to effectively collaborate with other programs to learn more about curriculum
- Agencies that would be most effective for you to partner with to ensure healthy infant toddler and family development is supported

Technology Option:
- Video record for future reflection

III. Assessment Rubric

ITC Level 5 Learning Experience and Implementation Custom Rubric					
Competency	Distinguished	Competent	Developing	Unacceptable	Unable to Assess
<p>CPD1: Identifies foundational components of high-quality, responsive, infant and toddler care</p> <p>Zero to Three: N/A</p>	<p>Provides examples of how foundational components of high-quality infant and toddler care, including relationships, play, and continuity of expectations between practitioners and settings, are represented in curriculum for infants and toddlers and their families</p> <p>Provides examples of how abilities fostered during the infant-toddler period relate to the child's emerging understanding of literacy, math, and science</p> <p>Names sources of evidence-based practices, theory, research, and state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program</p>	<p>Provides examples of how foundational components of high-quality infant and toddler care, including relationships, play, and continuity of expectations between practitioners and settings, are represented in curriculum for infants and toddlers and their families</p> <p>Provides examples of how abilities fostered during the infant-toddler period relate to the child's emerging understanding of literacy, math, and science</p> <p>Names sources of evidence-based practices, theory, research, and state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program</p>	<p>Provides examples of how foundational components of high-quality infant and toddler care are represented in curriculum for infants and toddlers and their families</p> <p>Provides examples of how abilities fostered during the infant-toddler period support infant/toddler understanding of literacy, math, and science</p> <p>Names sources of evidence-based practices, theory, research, or state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program Standards)</p>	<p>Provides incomplete or inaccurate examples of how foundational components of high-quality infant and toddler care are represented in curriculum for infants and toddlers and their families</p> <p>Provides incomplete or inaccurate examples of how abilities fostered during the infant-toddler period support infant/toddler understanding of literacy, math, and science</p> <p>Names inaccurate sources of evidence-based practices, theory, research, or state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program Standards)</p>	

	Standards) Identifies strategies supportive of family knowledge of the foundational components of high-quality, responsive, infant and toddler care	Standards)			
Competency	Distinguished	Competent	Developing	Unacceptable	Unable to Assess
<p>CPD2: Identifies culturally, individually, and developmentally responsive curricular strategies that nurture infant/toddler development, learning, mental health, and well-being</p> <p>Zero to Three: C-1a, L&L-3f</p>	<p>Provides examples of how curriculum for infants and toddlers respects cultural differences, reflects individual needs and abilities, and fosters and is based on unique skills and abilities</p> <p>Describes how music, movement, and other methods of creative expression contribute to development and learning in infants and toddlers</p> <p>List ways to support emergent literacy (e.g., picture naming, music), math (e.g., counting toes), and science (e.g., observation) in infants and toddlers</p> <p>Describes experiences and strategies that support infants/toddlers'</p>	<p>Provides examples of how curriculum for infants and toddlers respects cultural differences, reflects individual needs and abilities, and fosters and is based on unique skills and abilities</p> <p>Describes how music, movement, and other methods of creative expression contribute to development and learning in infants and toddlers</p> <p>List ways to support emergent literacy (e.g., picture naming, music), math (e.g., counting toes), and science (e.g., observation) in infants and toddlers</p> <p>Describes experiences and strategies that support infants/toddlers'</p>	<p>Provides examples of how curriculum for infants and toddlers fosters and is based on unique skills and abilities</p> <p>Identifies curriculum strategies supportive of infant/toddler development and learning. Strategies identified appropriate and lacking holistic support for development and learning</p>	<p>Relationship between curriculum, development and learning not synthesized</p> <p>Curriculum strategies identified not supportive of infant/toddler development and learning</p>

Observation and Curriculum Development Planning Form

Child's Name:	Date:
Child's Age:	Time:

Utilized Observation Strategy:
Domain(s):

Developmental Profile

Observation

Guiding questions:

- How does the child seem to prefer to interact with the world?
- What skills or activities appear to lead to frustration or challenge?
- What developmental skill does s/he appear to be working on?
- What holds the child's interests in the environment?
- What else do I need to know?
- What questions do I have for the child's family?

Reflection on interaction between child and environment, including:

- The child's preferences regarding relationships
- Daily routines
- Needs for of adaptive equipment, adaptations, accommodations, and modifications
- The child's strategies for interacting with the environment:

Reflection on unique learning needs

- Creative expression
- Family context (culture, language)
